## INTRODUCTION

This report represents the eighteenth (18) consecutive year that Carl Sandburg College has surveyed all career, technical and health education graduates. This survey is conducted annually with the hope of providing current labor market information for prospective students, current students, faculty, staff and administration. The annual survey can be a useful tool for career planning, academic advising, and curriculum and services modifications.

### Methodology

Surveys were mailed to all career, technical and health education graduates in November 2011. Those who did not respond were mailed/e-mailed again in February 2012. Follow-up telephone calls and e-mails to non-responders were conducted in March and April 2012. Surveys were sent to graduates who completed programs in December 2010, May 2011, and August 2011.

Of the 350 graduates surveyed, 90 responded (25% response rate).

For each program, survey results are given for the following:

- Number of graduates
- Number of survey responses

Of those responding:

- Number employed
- Number employed/career related
- Number employed/career related/in-district
- Average hourly wage overall and career-related
- Average hours worked per week overall and career-related
- Level of satisfaction with skills/technical courses in program major
- Level of satisfaction with general education courses outside program major
- Level of satisfaction with services

Written comments from graduates were forwarded to the President, Vice President of Academic Services, Dean of the Career, Technical and Health Education, and the Associate Deans of Nursing and Social and Behavioral Science.
